It is possible to join as two players, one from each squad of AI opponents; however a single player must have joined the current game state. When a full squad is spawned, a lobby will open where all available team members can join at the same time. It is possible for the lobby to get saturated with players when the game is played for a large amount of time, however spawning more will result in a less crowded lobby.. Inputs: 6th generation Intel Core i7 Processor (7th generation Intel Core i7/i5 processors).. 4K The X-58's main weapon is a powerful energy projector. With its energy shield, it is protected by an effective energy barrier. Since most enemies do not deal enough damage, the main weapon can kill them while they are in a vulnerable state. Additionally, its shields enable it to shield critical hits, eliminating the need to have a shield up to help with the damage being dealt. When using a power charge, enemies are rendered vulnerable, and this is especially true when firing.
